EDUCATION

B.Tech Computer Science , Vellore Institute of Technology, Andhra Pradesh, India	2021 - Present
CGPA : 8.91	
Intermediate , Chaitanya Junior College, Andhra Pradesh, India	2019 - 2021
Percentage : 99.4%	
Class X , Sree Vidya High School, Andhra Pradesh, India	2018 - 2019
CGPA : 10.00	

SKILLS

Languages & Technologies	Java, Python, MERN, HTML, CSS, Javascript ,MySQL,Mongo DB
Technical Skills	SQL, Data Structures, Machine Learning, Deep Learning, Data Analysis, NLP
Relevant coursework	Data structures, Operating systems, DBMS, Computer Networks, Machine Learning
Languages	English(Proficient), Telugu(Proficient), Hindi(Intermediate)

WORK EXPERIENCE

AI-ML Intern

- Developed a sentiment analysis model for Amazon Alexa reviews using random forest, XGBoost, logistic regression, and SVM, increasing prediction accuracy by 94.07% .
- Integrated AI algorithms with web application, enabling real-time user interaction and delivering instant sentiment analysis results, boosting user engagement and reducing response time.

PROJECTS

Learning Management System using MERN Stack

- Designed Infonity, a Learning Management System for instructors and students, allowing admins to manage educational content and students to access learning materials and content.
- Collaborated with a team of 5 members and built this project by using React JS, HTML, CSS, Bootstrap for the frontend and Express JS, Node JS for the backend. MongoDB served as the project's database.

Plant Leaf Disease Detection Using Deep Learning Architectures

- Worked with a team of 3 members and built a model which classifies the plant leaf disease by passing the leaf image using CNN architecture.
- Designed various models using distinct CNN architectures, including VGG16, VGG19, ResNet, GoogleNet, and AlexNet. Conducted a thorough accuracy analysis across all models, executing the project on the Google Colab platform.

CERTIFICATIONS

- Ethnuns MERN Full stack Intern (Certificate)
- AWS Certified cloud Practitioner (Certificate)
- Mentorship Program(Certificate)
- Generative AI from AWS (Certificate)

ACHIEVEMENTS

- Organized and directed coding competitions for Geeks for Geeks club at VIT-AP, attracting over 150 participants, significantly improving programming proficiency, and fostering a 35% increase in club membership.
- Honored as the 2nd top intern among the top 10 in my recent AIML internship, with our eCommerce sentiment analysis project on Amazon Alexa reviews recognized as one of the top 2 projects.
